

AXIOM

Riddell Axiom combines our deep experience in athlete protection, helmet technologies, and fitting technology developed for Precision-Fit to deliver the most advanced helmet platform on the market.

INSITE SMART HELMET TECHNOLOGY

This innovative impact sensing and reporting system collects and transmits head impact data from the field in real-time and comes standard in all Axiom helmets.

EXPANDED FLEX SYSTEM

Flex panels added to sides and back of the shell interact and work together with the face mask attachment system to improve impact response.

FRONTAL PROTECTION SYSTEM

Removing the top bar of a traditional face mask allows for more flexibility within the frontal protection system. Learn more about face masks and visors on pages 28-29.

TRU-FIT

A custom combination of interior liner pads work together to create a personalized fit and protection system.
